The Smart Route to the New World

Transformations to SAP S/4HANA have been a business reality for a long time. Established SAP customers arrive at a new enterprise platform via a variety of routes.

Many use the opportunity to establish a totally new process and system landscape in a greenfield approach while continuing to use existing best practice processes and systems.

Parallel operation of different ERP systems and releases poses a challenge, especially in process and system landscapes that have evolved over a period of years.

What is the goal? Initiatives of this kind seek to harmonize and consolidate entire enterprise platforms in a way that is both audit-proof (compliant) and highly efficient. The intention is to harmonize the design of processes, organizational structures, applications, functions, and data.

To accomplish the migration to SAP S/4HANA, existing systems and data must be transformed into SAP S/4HANA compatible solution structures. This entails harmonizing structures and processes, standardizing master data, cleansing legacy data, and similar housekeeping tasks. The next step is to complete the technical migration to SAP S/4HANA by migrating the ERP data from the existing source systems.

cbs Enterprise Transformer®
Innovation from the Leader in Quality

cbs Enterprise Transformer® for SAP S/4HANA® is the world's first comprehensive standard software for migrating existing process and system landscapes flexibly and holistically to the solution and data structures of SAP S/4HANA.

cbs ET offers best practice transformations for all existing SAP system change scenarios. It also provides end-to-end tailored business solutions for complex company-wide business and corporate restructuring scenarios. cbs ET enables entire SAP enterprise platforms to be standardized, harmonized, and consolidated quickly and reliably.

cbs ET provides continual support for sustainable, strategic transformation management processes.

Automated Data Transfer – Migration over a Weekend

cbs ET makes it possible to migrate data to an SAP S/4HANA system almost without restrictions. So, what does this mean for go-live? Ideally, users log out of the legacy system on Friday evening and when they log back in on Monday morning they can continue working exactly where they left off in open purchase orders, deliveries, billing documents, and projects in the system.
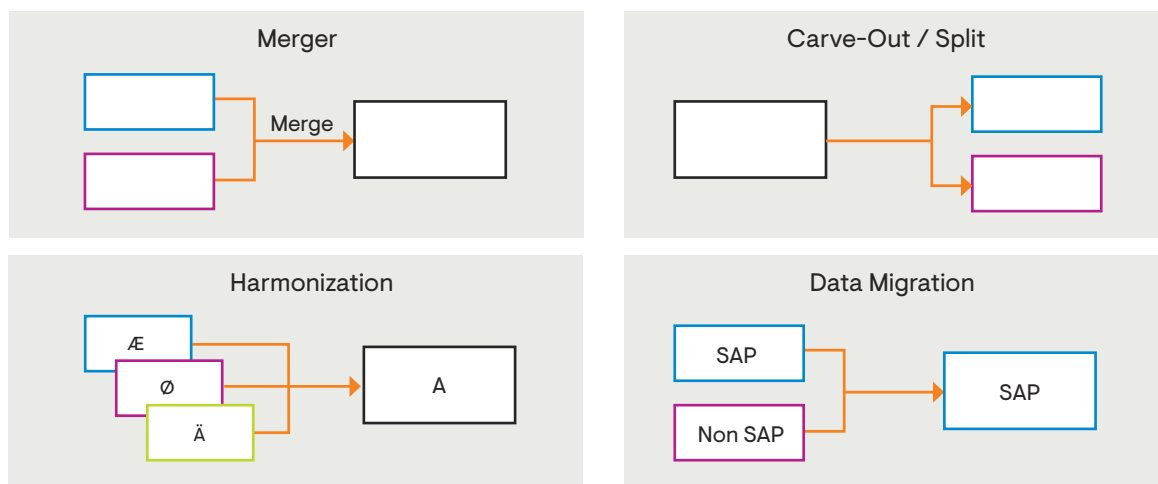

Migration to SAP S/4HANA – Simple and Seamless

cbs ET enables all structures, business objects, master data, transaction data, and historical data to be transferred directly from ERP systems to SAP S/4HANA. All relevant transition strategies are supported, including migration from non-SAP systems.

The transformation scope is flexible and tailored to the customer: Whether you want to transfer all historical data or just data from a specific period (for example, two years), or whether you want to do this across defined organizational units or based on selected business processes – cbs ET can handle the full spectrum of requirements. It makes all kinds of transformations calculable, easy, and reliable – whether a greenfield, brownfield, or landscape scenario.

One Standard Software for all Migration Scenarios

Features	Technologie
Consistent, process-oriented approach	End-to-end transformation solution
Central transformation management	No separate implementation system
Near-zero downtime support	High-speed data transformation
Analysis and evaluation functions	Minimally invasive – no business impact
Flexible, customer-specific solutions	Direct database update & standard methods

M-cbs – Project Methodology and cbs DNA

The combination of our standard "cbs Enterprise® Transformer for SAP S/4HANA®" (cbs ET) software and the M-cbs methodology-based transformation approach offers clear benefits for companies making the move to SAP S/4HANA. M-cbs is a unique methodology tailored to the specific challenges involved in SAP-supported transformation and optimization projects of all types, sizes, and scopes.
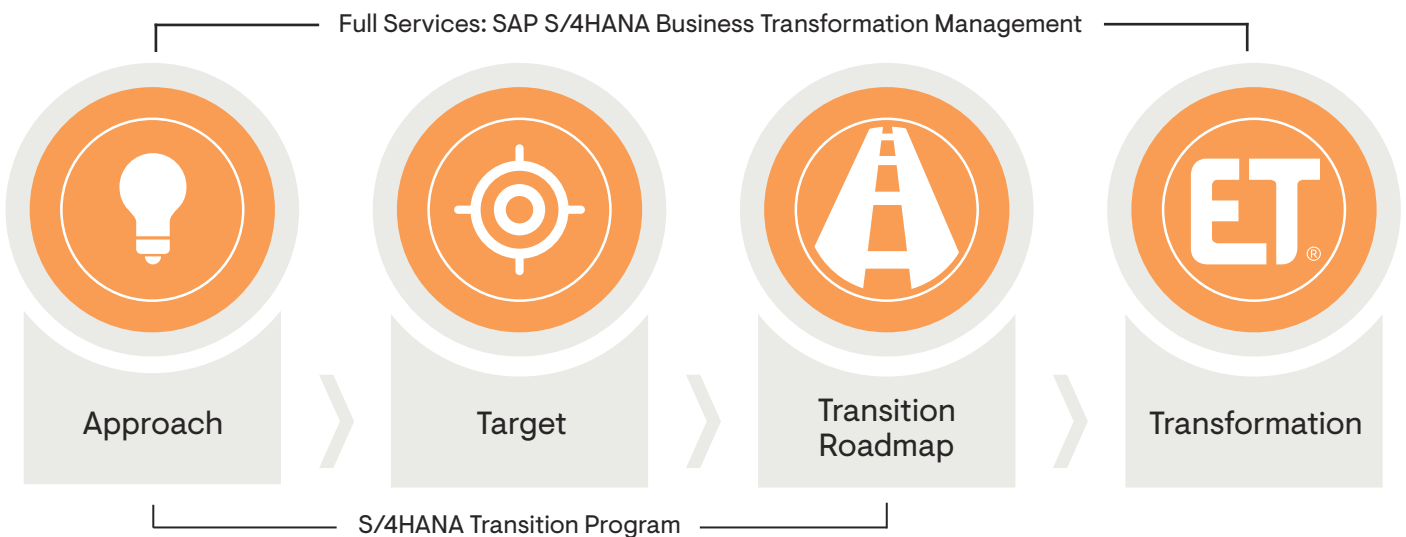

The consistency M-cbs offers is one particular advantage our clients enjoy. Using integrated techniques, we'll guide you as you progress from defining your strategy and designing processes and solutions to implementing them around the world.

The Right Method for Implementing the SAP S/4HANA Enterprise Solution

M-cbs allows companies who are making the move to SAP S/4HANA to take advantage of knowledge and best practices from more than 1,500 transformation projects and more than 20 years of project experience.

The transformation approach used must be tailored to the individual company. A comprehensive approach and strategic preparation should be used for the implementation. The business and IT agendas must be integrated in a methodical and efficient manner. Only then will the transition to a new software platform be a sustainable strategic success.

Comprehensive Transformation Support

Full Services: SAP S/4HANA Business Transformation Management

Approach 〉 Target 〉 Transition Roadmap 〉 Transformation
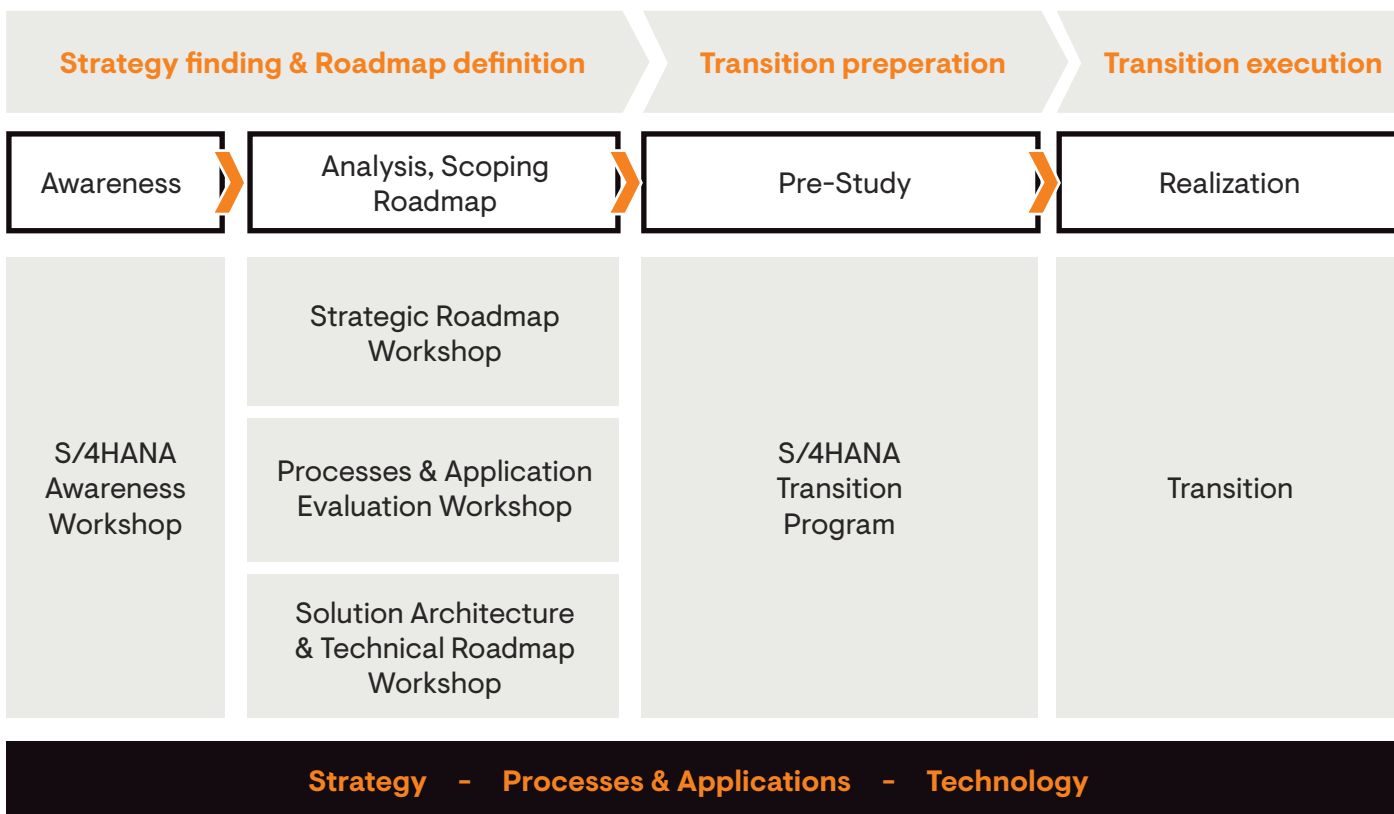

S/4HANA Transition Program

The end-to-end transformation portfolio offered by cbs allows companies to design their strategy, business processes, systems, and data from a single source. cbs consultants devise a tailored road map together with the customer, design a sustainable digital enterprise solution, and ensure that the transformation is implemented successfully around the world.

Management Guidance – cbs SAP S/4HANA Transition Program

Our "cbs SAP S/4HANA Transition Program" is a management consulting offering, which unites the core requirements of companies with SAP's innovation agenda from a methodological and technical perspective.

It enables companies to define impact, scheduling, and optimal transition scenarios – while taking corporate strategy, business processes, master data, IT strategy, SAP applications, and technologies into consideration. The result is a business-oriented SAP business agenda for customer requirements.
